for administrators and others involved in the transition to block schedules this book provides answers to the complex and challenging questions raised by the curious and the skeptical it demonstrates how to overcome obstacles to systemic school improvements

the handbook of experimental economic methodology edited by guillaume r fr chette and andrew schotter aims to confront and debate the issues faced by the growing field of experimental economics for example as experimental work attempts to test theory it raises questions about the proper relationship between theory and experiments as experimental results are used to inform policy the utility of these results outside the lab is questioned and finally as experimental economics tries to integrate ideas from other disciplines like psychology and neuroscience the question of their proper place in the discipline of economics becomes less clear this book contains papers written by some of the most accomplished scholars working at the intersection of experimental behavioral and theoretical economics talking about methodology it is divided into four sections each of

which features a set of papers and a set of comments on those papers the intention of the volume is to offer a place where ideas about methodology could be discussed and even argued some of the papers are contentious a healthy sign of a dynamic discipline while others lay out a vision for how the authors think experimental economics should be pursued this exciting and illuminating collection of papers brings light to a topic at the core of experimental economics researchers from a broad range of fields will benefit from the exploration of these important questions

every decision about energy involves its price and cost the price of gasoline and the cost of buying from foreign producers the price of nuclear and hydroelectricity and the costs to our ecosystems the price of electricity from coal fired plants and the cost to the atmosphere giving life to inventions lifestyle changes geopolitical shifts and things in between energy economics is of high interest to academia corporations and governments for economists energy economics is one of three subdisciplines which taken together compose an economic approach to the exploitation and preservation of natural resources energy economics which focuses on energy related subjects such as renewable energy hydropower nuclear power and the political economy of energy resource economics which covers subjects in land and water use such as mining fisheries agriculture and forests environmental economics which takes a broader view of natural resources through economic concepts such as risk valuation regulation and distribution although the three are closely related they are not often presented as an integrated whole this encyclopedia has done just that by unifying these fields into a high quality and unique overview the only reference work that codifies the relationships among the three subdisciplines energy economics resource economics and environmental economics understanding these relationships just became simpler nobel prize winning editor in chief joint recipient 2007 peace prize jason shogren has demonstrated excellent team work again by coordinating and steering his editorial board to produce a cohesive work that guides the user seamlessly through the diverse topics this work contains in equal parts information from and about business academic and government perspectives and is intended to serve as a tool for unifying and systematizing research and analysis in business universities and government
